DEPARTMENT OF THE AIR FORCE
WASHINGTON

OFFICE OF THE SECRETARY

Dear Mr. [REDACTED]

This is in reply to your request for information on unidentified flying objects.

I am inclosing a brochure on Project Blue Book, the Air Force UFO project. This brochure contains information on this program since its origin in 1948.

Sincerely,

Sara B. Hunt

Gentlemen,

I was looking at stars
and planets with my
telescope December 20, 1965,
5:50 P.M. E.S.T. as usual.
I looked to the North
and I saw a bright object
in the sky. It was
almost as bright as
Venus. The object was
travelling North to
South. Its shape was
like this and it

had bands like in the
picture of the object.
It was too high to
be an airplane.

Can you identify the
object for me?
Was it a Space Ship?

I was in the 3rd
grade

Yours truly,

Dannville Va.

1 DEC 65
Southampton, England

Southampton again

From the *Southern Evening Echo* of December 4, 1965, we read how Miss Wendy Boulton, a bank clerk watched an object from her bedroom window on the evenings of the 1st, 2nd, and 3rd December. The report continues: "The first time I saw it was when it rushed across the sky from the direction of the docks," she says.

"Now, apparently, the object has taken up station roughly over Thornhill housing estate. Wendy and her father, Mr. F. J. Boulton, who runs a fishmonger and fruiterer business, have looked at it through powerful binoculars.

"It appears as soon as it gets dark and is brighter than all the stars. It is oval in shape and seems to have fins sticking out," says Wendy.

"Mr. Boulton sees it as 'rather like a firework sparkler. It moves around; last night it was over the Civic Centre."

Tucuman, Argentina
4 December 1965

Near Tucuman, Argentina, a UFO landed in an alfalfa field on the night of December 4th, and was seen by many people, including Antonio Lozano and Cecilio Lopez. The former investigated the site the next morning. He found a burned circle, and a piece of paper with the message "CHNYNOSS" on it. This apparently means as little in Spanish as it does in English. The paper was left with scientists at Tucuman University for further study.

Finally, according to the English-language Buenos Aires Herald of December 5th, Father Segundo Benito Reyna, Director of the San Miguel Observatory in Argentina, has found clearly-visible UFOs in photographs taken of the moon. On another occasion recently, he saw a UFO closely following the U. S. satellite Echo II.

Gentlemen:

In a recent newspaper article, I read where to write you about my U.F.O. sighting. My sighting was several months ago, and I had all but forgotten about it until I started reading recent reports on them.

My report goes as follows:

On the night of December 10, 1965, a Friday, I went to Ocala National Forest to spend the weekend at our campsite along with my father-in-law. That night, I went to the City of Leesburg about 22 miles from our camp to visit some friends of mine. Upon my return trip to our camp is when I saw what I would say to be an U.F.O.

It was about 11:00 P.M. and I was traveling in a northeast direction around Lake Weir between the towns of Weirsdale and Okiawaha on Alt. 441. About 1 mile out of Weirsdale, I crossed a large hill which descends into a deep valley which is surrounded on all sides by orange trees.

When I looked off to my left, I could see Lake Weir, a sight which I had seen many times before. But this time, I also saw something else. At the base of the hill where the valley meets the lake, there was a large, oval disk of a silvery color. I was driving at about 60 m.p.h., and I slowed to about 35 m.p.h. in order to get a better look. I would say the object was about $\frac{1}{2}$ of a mile from the highway, hovering about 50 to 100 feet off the ground. I observed no lights from the object but could clearly see it because the moon was full. From this distance, I would say it was approximately 90 feet in diameter and nearly 20 feet thick. I did not stop my car for a closer look at the time, but the next day on another trip to Leesburg, I observed the same area and there was no object which looked like the thing I had seen the night before.

I know that this is a long time afterwards to report my sighting but if you could help solve my mystery, I would deeply appreciate it.

Thanking you in advance,

[REDACTED]

Nazareth & Hanover Twnship, Pa
10 December 1965

On the night of December 10th, three women who would not allow the newspapers to release their names, saw a UFO over their automobile on a road between Nazareth and Hanover Township, Pa. They described it as a round object with a dome and about 30 lights on the rim, and with a big blinking light in the center. After hovering in a tilted position for a few seconds, just a few yards above the vehicle, it shot upwards and went out of sight. There was no interference with the car's motor. (Allentown, Pa. Sunday Call-Cronicle, 12/26/65.).....

Peru to Tahiti
13 December 65

Finally, a Reuters report dated December 13th states that three members of a raft expedition from Peru to Tahiti told reporters that, while they drifted alone in the open sea, a UFO approached their raft one night and gave off so much light that they could read by it.
